Attorney General's Office
100 N. Carson Street
Carson City, Nevada 89701-4717

17 The United States of America ("United States") and the Walker River Paiute Tribe ("Tribe")
18 have jointly moved this Court to (1) grant leave to serve their First Amended Counterclaims upon
19 surface and groundwater claimants in the Walker River Basin; (2) eliminate the requirement for
20 personal service upon those surface water claimants Mineral County has served successfully; (3)
21 establish a procedure for service of future pleadings upon joined parties; and (4) to approve forms for
22 purposes of notice and waiver.

23 The State of Nevada ("Nevada") respectfully submits this response to the motion ("Joint
24 Motion"). In addition, Nevada moves, pursuant to Rule 12(e) of the Federal Rules of Civil Procedure,
25 for a more definite statement because the Joint Motion is so vague and ambiguous that Nevada simply
26 cannot reasonably be required to frame a responsive pleading. The United States and the Tribe have
27 made sweeping assertions of claims to groundwater throughout the Walker River Basin without
28 specifically linking their claims to particular groundwater rights in particular locations. Because of the

64

1 wholesale nature of the allegations, it is excessively difficult for Nevada as well as other current or
2 potential parties to formulate a proper response. To allow the United States and the Tribe to proceed
3 with a blanket attempt to serve all groundwater claimants along the Walker River system could subject
4 many claimants to the significant expense of securing legal counsel to determine whether their
5 participation in these protracted proceedings is warranted. (*See, McHenry, et al. v. Renne et al.*, 84 F.3d
6 1172, 1174 (9th Cir. 1996); F.R.C.P. 12(e) motion granted requiring the plaintiffs to file a second
7 amended complaint which clearly and concisely explains which allegations are relevant to which
8 defendants.)

9 **I. Introduction**

10 The United States and the Tribe argue that because each has filed First Amended Counterclaims
11 asserting various claims to groundwater along the Walker River system, “[r]esolution of the question of
12 who should be served, and which claims shall be included, before proceeding further in this matter will
13 promote judicial economy and avoid unnecessary expenses in this case.” Joint Motion, p. 5. Nevada
14 agrees that resolution of the question of who should be served and which claims shall be included is
15 necessary and further suggests that the onus is on the United States and the Tribe to initially assert their
16 claims with enough reasonable specificity so as to enable the identification of claimants to be served
17 and then to allow for the formulation of adequate responses by the parties following service.

18 Relying upon the supporting affidavit of Peter Pyle for the argument that groundwater in the
19 Walker River Basin is hydrologically connected to surface water, the movants declare:

20 As a practical matter such connection means that the source of water for
21 users along the Walker River, whether as a direct diversion of surface
22 water from the stream, or as a diversion by pumping the connected
23 groundwater, is actually the same source of water. . . . Thus, as the
24 purpose of these proceedings is to determine the relative rights of those
25 claimants who are claiming water from the same source, it is necessary to
26 join both the surface and groundwater claimants.

27 Joint Motion, pp. 5, 6. As articulated below, the expansion of the United States’ and the Tribe’s claims
28 to include unspecified groundwater along the geographically varied Walker River system reveals many

Attorney General's Office
100 N. Carson Street
Carson City, Nevada 89701-4717

1 unresolved jurisdictional issues¹ which of necessity must be further refined before Nevada can
2 reasonably respond to the Joint Motion.

3 The precise nature of the United States' and the Tribe's claims to groundwater remains
4 unknown. For instance, are the movants seeking to resolve perceived conflicts between groundwater
5 pumping and their surface water claims under the rubric of the *Walker River Decree*? Are these
6 movants seeking to reopen the sixty-year-old decree to bring under this Court's continuing jurisdiction
7 property rights to groundwater administered in Nevada² exclusively by the State Engineer? Obviously,
8 the latter objective raises significant concerns as it could conflict with Nevada's system of
9 administering its groundwater resources. If indeed the United States and the Tribe are seeking to
10 expand this Court's jurisdiction over the *Walker River Decree* to include claims to groundwater, then
11 are they also proposing to serve all domestic well owners³ along the Walker River system who have
12 unpermitted, but nevertheless valuable, property interests in groundwater? Are the United States and
13 the Tribe proposing to serve all as yet undetermined vested groundwater right owners?⁴ Are the United
14 States and the Tribe intending to serve all other types of water users,⁵ many of whom may hold neither
15 decreed surface water rights nor supplemental irrigation rights to groundwater administered by the State
16 Engineer? These are some of the questions that should be answered before this Court decides the Joint
17 Motion before it.

18 ////

19
20 ¹ The Nevada State Engineer administers Nevada's groundwater code contained in Nevada Revised Statutes ("NRS")
21 Chapter 534, which authorizes the State Engineer to regulate groundwater usage. The authority of the State Engineer over
22 groundwater in Nevada has been part of Nevada's legal landscape with respect to artesian groundwater since 1913 and for
23 percolating groundwater since 1939. The *Walker River Decree* adjudicated only surface water rights to the Walker River.

24 ² Obviously, Nevada does not presume to speak for the State of California and its very different system for managing its
25 water resources.

26 ³ The State Engineer does not issue permits for domestic wells. NRS 534.185.

27 ⁴ A claim of vested right is defined as one which pre-dates the enactment of Nevada's statutory scheme for obtaining a
28 permit to appropriate the public waters of the state. To validate such a claim, it must be established that steps were taken to
divert and apply the water to beneficial use before 1913 for artesian groundwater or before 1939 for percolating
groundwater. See, 1913 Nev. Stat. 140; NRS Chapter 534. These pre-1913 or pre-1939 rights are also commonly referred
to as pre-statutory groundwater rights. The State Engineer is authorized to conduct a basin-wide groundwater adjudication
to determine the identity of the vested owners of groundwater in the Walker River Basin. See, NRS 533.090-533.320.

⁵ Examples of other groundwater uses are stockwater, commercial, municipal, quasi-municipal, mining and recreation.

II. Relevant Procedural Background

1
2 This Court entered the final *Walker River Decree* in 1936 establishing the rights to the surface
3 waters of the Walker River as between the United States acting for the Walker River Paiute Tribe and
4 competing claimants. *United States v. Walker River Irrigation District*, 1 F.Supp. 158 (D.Nev. 1935).
5 On appeal, the U.S. Court of Appeals for the Ninth Circuit reversed some of the district court's
6 holdings. *United States v. Walker River Irrigation District*, 104 F.2d 334 (9th Cir. 1939). The decree
7 was amended according to the mandate from the Ninth Circuit on April 24, 1940. The *Walker River*
8 *Decree* adjudicated only the rights of the claimants to the surface waters of the Walker River and does
9 not address in any way groundwater rights.

10 The Tribe filed its initial counterclaim on March 18, 1992, seeking the recognition of a right to
11 store water in Weber Reservoir for use on the Walker River Indian Reservation and for a federal
12 reserved water right for lands restored to the Reservation in 1936. These claims are in addition to the
13 surface water rights decreed to the United States for the benefit of the Tribe in the *Walker River Decree*.
14 The United States moved for leave to file its initial counterclaim on July 22, 1992, asserting claims
15 similar to the Tribe's for the benefit of the Walker River Indian Reservation. Nevada and the Walker
16 River Irrigation District ("WRID") filed motions to dismiss the counterclaims, arguing that if the
17 claims are allowed, all existing claimants to the Walker River and its tributaries should be served. *State*
18 *of Nevada's Preliminary Threshold Motions re Dismissal of Counterclaims, Additional Parties and*
19 *Service of Process* (August 3, 1992), pp. 3-8; *Walker River Irrigation District's Motions to Dismiss*
20 *Counterclaims; to Require Joinder of Parties; and to Require Service of Process in Accordance with*
21 *Rule 4 of the Federal Rules of Civil Procedure* (August 3, 1992), p.2. The Court denied the motions to
22 dismiss and ordered the United States and the Tribe to join as parties all the claimants to waters of the
23 Walker River. *Order* (October 20, 1992). Since this Order, the parties have stipulated to numerous
24 extensions of time for completion of service.

25 On April 7, 1994, the United States filed a *Motion for Instructions and Order*, seeking the
26 Court's clarification of whether groundwater users should be included in the United States' and Tribe's
27 service of process. By Order of this Court on July 8, 1994, the Court addressed this issue. At the time,
28

1 the Court provided the following summary of the United States' and Tribe's positions relative to joining
2 groundwater rights' holders:

3 [T]he U.S. and the Tribe assert that the groundwaters of the Walker River
4 basin are hydrologically connected to and are part of a single unitary water
5 supply with the surface waters of the Walker River and its tributaries. Based
6 on this assertion, the U.S. and the Tribe speculate that increased groundwater
7 use will eventually compete with surface water use, in that use of one source
8 of supply necessarily comes at a loss to the other. On this basis, the U.S. and
9 the Tribe assert that all water in the Walker River Basin forms a single res and
10 to do full justice in equity, all claimants to water from that single res, be they
11 ground or surface water claimants, must be joined.

12 Order (July 8, 1994), p. 5.

13 Rejecting the United States' and Tribe's arguments, the Court declared:

14 Without deciding this issue at this time, the Court notes that even if a
15 claim to groundwater rights was currently asserted, the U.S. has alleged
16 no reason why joinder of all groundwater claimants in the Walker River
17 basin is required. While there has been some indication in supporting
18 documents [citations omitted] that groundwater sources are
19 hydrologically connected to each other and to the Walker River, there is
20 nothing to indicate the extent of this connection is such that withdrawal of
21 groundwater on the restored reservation lands will have any effect on
22 surrounding groundwater claimants.

23 On July 30, 1997, the Tribe filed its *First Amended Counterclaim of the Walker River Paiute*
24 *Tribe* which asserts, in addition to surface water claims previously made in its original counterclaim,
25 also advances groundwater claims for the Walker River Reservation. On July 30, 1997, the United
26 States filed its *first Amended Counterclaim of the United States of America*. Combined with the surface
27 water claims made in its original counterclaim, the United States asserts other claims to surface water
28 and groundwater throughout the Walker River Basin. These claims for other federal enclaves include
claims for the Hawthorne Army Ammunition Plant, the Toiyabe National Forest, the Mountain Warfare
Training Center of the United States Marine Corps and the Bureau of Land Management. The United
States also asserts claims for surface and groundwater for the Walker River Indian Reservation, the
Yerington Reservation, the Bridgeport Paiute Indian Colony and several individual allotments.

By their Joint Motion presently before the Court, the movants question whether the United
States and the Tribe must serve groundwater claimants in the Walker River Basin because of the claims
to groundwater advanced in their counterclaims. As a general proposition, to the extent the United
States and the Tribe make claims as part of their respective counterclaims which directly impact

Attorney General's Office
100 N. Carson Street
Carson City, Nevada 89701-4717

1 groundwater claimants in and near the Walker River Basin,⁶ Nevada agrees that basic fairness and due
2 process requires that all appropriate claimants should be afforded service of process. Despite this
3 general proposition, however, the undifferentiated nature of the Tribe's and the United States'
4 allegations about the general connection of the surface water resource to groundwater throughout the
5 vast Walker River system without delineating where the specific use of groundwater arguably impacts
6 their claims, either to surface or groundwater creates a moving target which cannot be reasonably
7 addressed.

8 **III. Mineral County's service of its claims should not relieve the United States and the Tribe of**
9 **their responsibility for service.**

10 Part 2 of the Joint Motion states that the United States and the Tribe are seeking "to eliminate
11 the requirement for personal service upon those surface water claimants Mineral County has served
12 successfully." *Joint Motion*, p. 2. As the Court is aware, Mineral County is seeking to intervene in this
13 case so as to achieve a reallocation of the Walker River system for the benefit of Walker Lake. *See,*
14 *United States of America v. Walker River Irrigation District*, In Equity No. C-125-ECR, Subfile C-125-
15 C. Although the merits of Mineral County's proposed intervention have not yet been addressed, it is
16 clear that the County's claims on behalf of Walker Lake are completely separate and distinct from those
17 being made by the United States and the Tribe. To relieve the United States and the Tribe of
18 responsibility to serve their claims upon claimants who have notice of the County's proposed
19 intervention would work an absurd result. Clearly, the Court cannot reasonably grant this request.

20 **IV. It is premature for the Court to establish a procedure for service and to approve forms for**
21 **purposes of notice and waiver.**

22 Because it is uncertain at this time as to the extent groundwater claimants are appropriately in
23 this action, it is premature for the Court to address Parts 3 and 4 of the Joint Motion.

24 ////

25 ////

26 ////

27 ⁶ Arguably the Walker River Basin comprises more than one basin as well as distinct areas referred to as subareas.
28 Without considering any applicable geographic areas in California, groundwater subareas in Nevada which are arguably the
subject of the United States' and Tribe's claims include the Nevada portion of Antelope Valley, Smith Valley, Mason
Valley, the East Walker Area, the Walker Lake Valley including the Schurz subarea, the Lake subarea and the Whiskey
Flat-Hawthorne subarea.

V. Conclusion

Based on the foregoing, the State of Nevada respectfully requests that the Court issue an Order directing the United States and the Tribe to provide more specifically which of their claims to groundwater require the joinder of groundwater claimants in which specific locations. The overbroad argument that groundwater and surface water are connected and all claims to surface and groundwater are derived from the same source is not sufficiently definite to afford the Court with the focus required to issue an order relative to service of groundwater claimants. Moreover, the United States and the Tribe should address whether groundwater claimants to be served include all permitted groundwater holders, domestic well owners, and vested groundwater right holders.
