**I. INTRODUCTION**

This case is about the single body of water that forms the Walker River Basin. In 1936, the Court entered its *Decree* (Apr. 14, 1936), as amended, *Order for Entry of Amended Final Decree to Conform to Writ of Mandate Etc.* (Apr. 24, 1940) (“1936 Decree”), addressing certain rights to the use of waters in the Walker River and its tributaries. At that time, the Court established its continuing jurisdiction over “changing the duty of water or for correcting or modifying this decree; also for regulatory purposes, including a change of the place of use of any water user . . . .” *Id.* ¶ XIV. Over the years, as scientific and technical knowledge of the Basin has advanced, it has become increasingly clear that the water in the ground and water on the surface in the Basin are hydrologically connected. Thus, it is only logical that claims involving groundwater use in the Basin now come before the Court because groundwater use affects the rights that the 1936 Decree determined, as well as the additional rights that the Tribe and the United States now claim.

Accordingly, on July 31, 1997, the Tribe and the United States filed the *First Amended Counterclaim of the Walker River Paiute Tribe* (July 31, 1997) (“Tribe’s 1<sup>st</sup> Amended Counterclaim”), and the *First Amended Counterclaim of the United States of America* (July 31, 1997) (“U.S. 1<sup>st</sup> Amended Counterclaim”). The amended counterclaims assert claims to additional water for the benefit of the Tribe for use on the Walker River Indian Reservation (“Reservation”). The United States has asserted additional claims on behalf of the Yerington Paiute Tribe, the Bridgeport Paiute Indian Colony, several allotments, and other federal interests throughout the Walker River Basin. See Joint Motion at 4 (listing additional federal claims). With respect to the Tribe and the Reservation, the Tribe and the United States request additional surface water rights and rights to use groundwater underlying and adjacent to the Reservation.

1 None of the other parties to these proceedings has filed an answer to either of the amended  
2 counterclaims.

3 On August 19, 1998, the Tribe and the United States filed the Joint Motion in which they  
4 request an order from the Court allowing them to serve groundwater claimants, in addition to  
5 surface water claimants, with their amended counterclaims. The rationale underlying the request  
6 is twofold. First, the Tribe and the United States have asserted the right to extract groundwater  
7 underlying and adjacent to the Reservation. Id. at 4-5. Second, the Tribe and the United States  
8 assert that groundwater and surface water are hydrologically connected such that joinder of  
9 groundwater claimants is necessary "to determine the relative rights of those claimants who are  
10 claiming water from the same source . . . ." Id. at 5. The Joint Motion expressly states that,  
11 "[e]ven if the Tribe and the United States were only making surface water claims in this  
12 proceeding, because of the hydrologic connectivity of ground and surface water in the basin, the  
13 surface water claims of the Tribe and the United States will effect groundwater users." Id. at 6.

14 The Tribe and the United States attached the *Affidavit of Peter M. Pyle* (Aug. 5, 1998)  
15 ("Pyle Affidavit"), to the Joint Motion supporting the claims of hydrologic connectivity. None of  
16 the other parties to these proceedings has filed any responsive expert affidavit. Indeed, all that the  
17 District, Nevada and California present is legal interpretation of the facts without providing any  
18 factual support. As a result, the expert testimony that the Pyle Affidavit presents is uncontested.

19 The District, Nevada and California all miss the point of the Joint Motion's request to  
20 include groundwater claimants in service of process, and instead confuse the Joint Motion's  
21 procedural request with actual adjudication of the Tribe's and the United States' additional claims  
22 to water in the Walker River Basin. The Joint Motion seeks the Court's permission to serve  
23 groundwater users because groundwater pumping in the Walker River Basin depletes the surface  
24  
25  
26  
27  
28

1 water flow in the Walker River. The depletion of surface flow extends to groundwater as the  
2 surface flow is the primary source of groundwater recharge in the Basin, particularly within the  
3 Reservation. The District, Nevada and California not only fail to acknowledge the effect of  
4 stream depletion due to groundwater pumping, they fail to provide any evidence that contradicts  
5 it.  
6

7 Moreover, the District and Nevada have adopted a stance that is at odds with the position  
8 they have pursued aggressively with respect to Mineral County's motion to intervene in these  
9 proceedings on behalf of Walker Lake. The District and Nevada have argued repeatedly in the  
10 C-125-C subproceedings that they oppose any consideration of the merits of Mineral County's  
11 motion to intervene until completion service of its intervention papers on all water rights  
12 claimants who Mineral County's water right claim could affect. With respect to the Tribe's and  
13 the United States' motion to serve groundwater users along with surface water users in the Basin,  
14 however, the District and Nevada have raised questions going to the merits of the claims for  
15 additional water even before service has begun. Such inconsistency to suit the moment is merely  
16 an effort to delay the eventual consideration of the Tribe's and the United States' claims that may  
17 affect current upstream water uses.  
18

19  
20 The Tribe and the United States have made additional claims to surface water and the  
21 groundwater underlying and adjacent to the Reservation, and with respect to the United States,  
22 underlying and adjacent to other tribal and federal enclaves in the Walker River Basin. The  
23 Tribe's and the United States' claims, and the prima facie demonstration of the hydrologic  
24 connection between surface water and groundwater in the Pyle Affidavit, are sufficient to invoke  
25 the Court's continuing jurisdiction over the subject matter of these proceedings. For the reasons  
26  
27  
28

1 set forth herein and in the Joint Motion, the Court should reject the contentions of the District,  
2 Nevada and California and grant the Joint Motion.

3  
4 **II. THE PRESENTLY PENDING REQUESTS TO**  
5 **MODIFY THE 1936 DECREE ARE WITHIN THE**  
6 **COURT'S CONTINUING JURISDICTION**

7 As a threshold matter, the Court has continuing jurisdiction over the waters of the Walker  
8 River and its tributaries in the Walker River Basin based upon the rights it adjudicated in the 1936  
9 Decree. Over the years, various parties have brought requests to "correct[] or modify[] this  
10 decree; also for regulatory purposes, including a change of the place of use of any water user  
11 . . . ." 1936 Decree ¶ XIV. As the Court held more recently,

12 the East Walker River and West Walker River and Main  
13 Walker River are interstate streams that have been previously  
14 adjudicated by this Court; [and]

15 That pursuant to said adjudication, this Court has  
16 continuing and exclusive jurisdiction over the waters of the East  
17 Walker River, West Walker River and Main Walker River in the  
18 State of California and State of Nevada.

19 *Order Regarding Petition for Instructions Regarding Use of Waters of East Walker River to*  
20 *Generate Hydro-Power* at 3 (July 1, 1985). None of the parties contests the Court's continuing  
21 jurisdiction. See District Response at 5 (describing Court's sole jurisdiction over 1936 Decree).

22 Instead, the District attempts to characterize the instant proceedings in which various  
23 parties have asserted claims to water in addition to the rights the Court adjudicated in the 1936  
24 Decree<sup>1</sup> as separate and distinct from the proceedings that resulted in the 1936 Decree. District

---

25 <sup>1</sup>Mineral County, Nevada, has also asserted additional claims to water in the Walker River  
26 Basin for the benefit of Walker Lake. It is worth noting that the depletion of surface water flow  
27 in the Walker River resulting from groundwater pumping upstream reduces the availability of  
28 surface water that flows into Walker Lake, just as that same activity reduces the amount of  
surface water that flows into the Reservation. See Pyle Affidavit at 4 ("Depletion of ground

1 Response at 18 n.6 (disputing that the instant proceedings are a continuation of those that resulted  
2 in the 1936 Decree). In so doing, however, the District ignores the two fundamental issues  
3 presented by the Tribe's and the United States' claims for additional water: 1) whether their  
4 claims affect the activities of groundwater claimants upstream from the Reservation; and 2)  
5 whether the activities of upstream groundwater claimants affect the Tribe's and the United States'  
6 claims.  
7

8 The District's, Nevada's and California's arguments are, then, merely an attempt to avoid  
9 that which they cannot dispute -- that this Court has jurisdiction over all claims to water that  
10 affect the rights it adjudicated in 1936. They also attempt to reach the merits of the Tribe's and  
11 the United States' additional claims to water before the Tribe and the United States have  
12 complied with the procedural requirements of the Court's orders and FED. R. CIV. P. 4. The  
13 result of such attempts is to further delay the Court's eventual consideration, after procedural  
14 compliance with FED. R. CIV. P. 4, of the merits of the Tribe's and the United States' claims,  
15 during which delay upstream water users can continue to use surface water and groundwater  
16 without challenge.  
17  
18

19 **A. THE UNITED STATES AND TRIBE HAVE SHOWN A CONFLICT BETWEEN**  
20 **SURFACE WATER AND GROUNDWATER USE.**

21 As the District points out, the Court previously has considered whether the Tribe and the  
22 United States must serve groundwater claimants as well as surface water claimants with their  
23 counterclaims pursuant to FED. R. CIV. P. 4. In its *Order* (July 8, 1994), the Court found that  
24 joinder of groundwater claimants was not necessary at that time for two reasons. First, the Court  
25

26 \_\_\_\_\_  
27 water in storage [in underground aquifers] leads to long-term ground-water level declines which  
28 are stabilized by increasing depletion from surface water sources, primarily the Walker River.”).

1 found that “[t]he U.S. never plainly state[d] that it is seeking groundwater rights. . . . A possible  
2 future claim by the U.S. and/or the Tribe to groundwater rights is not sufficient to justify current  
3 joinder into this litigation of all groundwater claimants in the Walker River basin.” *Id.* at 5-6.  
4 However, the Court continued: “At such time as the U.S. and/or the Tribe do assert claims to  
5 groundwater rights, it may be necessary to join other parties . . . .” *Id.* at 6. That time has come,  
6 since the Tribe and the United States both include claims to groundwater in their first amended  
7 counterclaims. Tribe’s 1<sup>st</sup> Amended Counterclaim ¶¶ 3, 6, 15, 22, Prayer for Relief ¶¶ 1(C), (D);  
8 U.S. 1<sup>st</sup> Amended Counterclaim ¶¶ 4, 15, 17-19, 21, 26, 32, 38, 46, 47, 50, 56, 58, 59, 65, 66, 69,  
9 70. Thus, the United States and the Tribe have satisfied the first criteria the Court identified for  
10 including groundwater claimants in service of their first amended counterclaims.  
11

12  
13 Second, the Court held that service of groundwater claimants was not appropriate because  
14 the United States and the Tribe did not “indicate that there is any current conflict between surface  
15 and ground water claimants.” *Order* at 11 (July 8, 1994). The Court sought more than mere  
16 speculation “that groundwater withdrawal on reservation lands will affect other groundwater  
17 claimants . . . .” *Id.* at 6. The Tribe and the United States have heeded the Court’s order by  
18 submitting the Pyle Affidavit with their Joint Motion.  
19

20 Mr. Pyle’s affidavit makes a prima facie showing that groundwater and surface water are  
21 hydrologically connected in the Walker River Basin, and goes on to demonstrate, relying upon  
22 various studies by entities such as the Nevada State Engineer, the United States Geological  
23 Survey, and independent analysts, that extraction of groundwater conflicts with the availability of  
24 surface water in the Walker River and its tributaries. Pyle Affidavit at 3 (“data indicate that well  
25 pumping will draw water from a wide area surrounding the well and will deplete streams when a  
26 well’s radius of influence extends to the stream. In other words, wells located closer to the  
27  
28

1 stream will have a faster and greater impact on streamflow than wells located farther from the  
2 stream.”); *id.* (“Increasing ground-water pumping and lowering of water levels near the Walker  
3 River undoubtedly cause stream depletion. Lowering of water levels away from the stream will  
4 eventually cause stream depletion over time as water level gradients steepen toward surface water  
5 sources.”); *id.* at 4 (“The primary source of [groundwater] recharge [in Smith and Mason Valleys]  
6 is the Walker River which becomes depleted as recharge is induced from the flow of the River to  
7 the ground-water system. Stream depletion is presently occurring in Smith and Mason Valleys  
8 due to ground-water pumping.”); *id.* at 5 (“These depletions [from groundwater pumping in  
9 Smith and Mason Valleys] are significant and have a substantial effect on the amount of flow that  
10 reaches the Walker River Indian Reservation (Wabuska Gage).”); *id.* at 6 (noting the Nevada  
11 State Engineers’ groundwater pumping curtailment orders when groundwater pumping exceeded  
12 perennial yield, and its groundwater level monitoring in Smith and Mason Valleys); *id.* at 7  
13 (“continued and increased pumping in future years could cause profound changes, especially in  
14 the characteristics of surface-water flow.” (quoting C.J. Huxel and E.E. Harris, U.S.G.S.  
15 (1969))). In short, the Pyle Affidavit demonstrates a clear conflict between surface water and  
16 groundwater use in the Walker River Basin.  
17  
18  
19

20 The District’s argument, in which California and Nevada join, that the Pyle Affidavit and  
21 the Tribe’s and the United States’ first amended counterclaims fail to “provide information which  
22 satisfies the Court’s requirement of specific allegations that the claimed right to additional water  
23 from the Walker River will result in competition between surface water and groundwater  
24 claimants,” falls short. District Response at 12. See also Nevada Response at 5-6; California  
25 Response at 5. The Pyle Affidavit clearly sets forth the required conflict between surface water  
26 and groundwater use, as the following table demonstrates:  
27  
28

	<u>1994</u>	<u>1995</u>	
1			
2			
3	Surface Inflow	130,200 afy	565,500 afy
4	Surface Water Diversion	91,400	265,300
5	Ground-water Pumping	153,500	49,200
6	Surface Outflow (Wabuska)	20,600	284,000

6 Pyle Affidavit at 5. This data plainly shows that the amount of groundwater pumping in the Smith  
7 and Mason Valleys is "large relative to the flow of the Walker River at Wabuska . . . ," near the  
8 River's entrance to the Reservation. Id. Moreover, the table shows that in both wet years and  
9 dry years, the surface outflow reflects stream depletion caused by groundwater pumping. Id.

10  
11 Thus, the Tribe and the United States have made a sufficient showing -- and have not  
12 "merely speculated" -- that surface water and groundwater in the Walker River Basin form a  
13 common source of water, and the use of one type of water will affect the availability of the other.  
14 Rather, it is the District, Nevada and California that have offered no evidence other than their own  
15 speculations. None of the opposing parties has presented evidence to contest the specific  
16 allegations of the Pyle Affidavit or the sources upon which it relies. Thus, the Tribe and the  
17 United States have made the requisite showing that within the Walker River Basin,  
18 "[g]roundwater and surface water are physically interrelated as integral parts of the hydrologic  
19 cycle." Cappaert v. United States, 426 U.S. 128, 142 (1976) (quoting C. CORKER,  
20 GROUNDWATER LAW, MANAGEMENT AND ADMINISTRATION, NATIONAL WATER COMM'N LEGAL  
21 STUDY NO. 6 at xxiv (1971)). The Court should, therefore, grant the Joint Motion.

22  
23  
24 **B. THE TRIBE'S AND THE UNITED STATES' ADDITIONAL CLAIMS ARE NOT  
25 GROUNDS FOR A NEW LAWSUIT.**

26 Nowhere in the Court's July 8, 1994 order did it hold that groundwater claims, or claims  
27 that groundwater use conflicts with surface water availability, are outside the Court's jurisdiction  
28

1 or these proceedings. Yet, the District, Nevada and California paint the Court's prior ruling as  
2 excluding service of groundwater claimants and requiring any consideration of groundwater  
3 claims, or claims of surface-groundwater conflict, in the Walker River Basin be in "new  
4 litigation." District Response at 8 (citing *Order* at 10-11 (July 8, 1994)). See also *id.* at 14 ("the  
5 Court's continuing jurisdiction does not apply to groundwater."); California Response at 3 (citing  
6 *Order* at 6-8 (July 8, 1994)); Nevada Response at 5 (citing *Order* at 5 (July 8, 1994)). The  
7 District also implies that consideration of groundwater claims in the Walker River Basin should be  
8 in "new litigation" because the Tribe and the United States have relied upon "jurisdictional bases  
9 [that] afford grounds for jurisdiction over new actions." District Response at 11 (citing 28 U.S.C.  
10 §§ 1331, 1345, 1362). See also *id.* at 14 (citing 28 U.S.C. § 1367).

13 Contrary to these assertions, the Court acknowledged that joinder of groundwater  
14 claimants may become necessary in these proceedings. *Order* at 9 (July 8, 1994). Indeed, the  
15 Court has long recognized that, "[f]ull justice cannot be done and anomalous results avoided  
16 unless all the rights of the parties before the court in virtue of the jurisdiction previously acquired  
17 are taken in hand." Rickey Land & Cattle Co. v. Miller & Lux, 218 U.S. 258, 262 (1910)  
18 (emphasis added) (affirming this Court's determination that all claims to water from the Walker  
19 River should be tried in the Federal District Court for Nevada, Miller & Lux v. Rickey, 146 F.  
20 574, 584 (C.C. Nev. 1906)). Furthermore, the United States Supreme Court has held that as a  
21 general rule all rights to water should be adjudicated in the same forum:  
22

23  
24 The clear federal policy . . . is the avoidance of piecemeal  
25 adjudication of water rights in a river system. This policy is akin to  
26 that underlying the rule requiring that jurisdiction be yielded to the  
27 court first acquiring control of property, for the concern in such  
28 instances is with avoiding the generation of additional litigation  
through permitting inconsistent dispositions of property. This  
concern is heightened with respect to water rights, the relationships

among which are highly interdependent. Indeed, we have recognized that actions seeking the allocation of water essentially involve the disposition of property and are best conducted in unified proceedings.

Colorado River Water Conservation Dist. v. United States, 424 U.S. 800, 819 (1976) (citing Pacific Live Stock Co. v. Oregon Water Bd., 241 U.S. 440, 449 (1916)). Accord Arizona v. San Carlos Apache Tribe, 463 U.S. 545, 569 (1983) (where the federal court suit “is well enough along” then it alone should proceed to adjudicate all rights to water in a river system in order to avoid “a waste of judicial resources and an invitation to duplicative effort.” (citing Colorado River, 424 U.S. at 820; Moses H. Cone Memorial Hosp. v. Mercury Constr. Corp., 460 U.S. 1, 16 (1983)).

The Court acquired jurisdiction over all water within the Walker River Basin on July 3, 1924. 1936 Decree at 4. In light of the Tribe’s and United States’ claims to groundwater, as well as the showing supported by the Pyle Affidavit that groundwater use conflicts with surface water use, it is fully consistent with the Supreme Court’s precedent that the Court grant the Joint Motion. In so doing, it should consider “all the rights of the parties,” including rights to use groundwater, so that it may accord them “full justice” and avoid “piecemeal litigation.” See Order at 8 (May 17, 1988) (noting congressional policy that “water rights should be adjudicated in one forum, and piecemeal litigation should be avoided . . . .”) (citations omitted).

The District, Nevada and California argue that under Nevada and California law, state courts treat groundwater and surface water separately,<sup>2</sup> and the decision to treat them separately

---

<sup>2</sup>Other states, such as Idaho, recognize the hydrologic connection between surface and groundwater and adjudicate both in their general stream adjudications. See, e.g., IDAHO CODE § 42-1406A (“Effective management in the public interest of the waters of the Snake River Basin requires that a comprehensive determination of rights of all surface and groundwater from that system be determined.”).

1 is relegated to the state legislatures. District Response at 12; Nevada Response at 3 nn. 1-4;  
2 California Response at 2-3 n.1. That Nevada and California laws treat the administration of  
3 groundwater and surface water separately does not determine the scope of federal reserved rights  
4 to water on behalf of an Indian tribe or other federal interests. The United States Supreme Court  
5 has held repeatedly that federal law alone is determinative of federal reserved water rights. See  
6 San Carlos Apache Tribe, 463 U.S. at 571 (the court adjudicating Indian water rights has “a  
7 solemn obligation to follow federal law.”); Cappaert, 426 U.S. at 138 (“the [federal reserved  
8 rights] doctrine applies to Indian reservations and other federal enclaves, encompassing water  
9 rights in navigable and nonnavigable streams.” (citations omitted)).  
10  
11

12 This Court, too, considered and rejected the effect of state law treatment of groundwater  
13 in this matter:

14 The requirements and procedures of state law are however,  
15 inapplicable in this action. As the Supreme Court reaffirmed in  
16 Cappaert v. United States, 426 U.S. 128, 145 (1975), a federal  
17 implied-reservation-of-water-rights and federal water rights in  
18 general “are not dependent upon state law or state procedures [.]” .  
19 . . The Court also held that the doctrine applies to both surface and  
20 underground supplies of water. Id. at 142-43.

21 Order at 8 (July 8, 1994).<sup>3</sup> State law simply has no role in the resolution of the issue whether the  
22 Tribe and the United States are entitled to groundwater in addition to surface water in order to  
23 satisfy the purposes for which the tribal and other federal enclaves were set aside. See Winters v.  
24 United States, 207 U.S. 564, 577 (1908); Cappaert, 426 U.S. at 142-43. As the Ninth Circuit

---

25 <sup>3</sup>The District and California take issue with the definition of “groundwater claimant,”  
26 arguing that the Tribe and the United States have not defined the term adequately either with  
27 respect to Nevada or California law. District Response at 8; California Response at 2-3 n.1. For  
28 purposes of federal law, the term is “synonymous[] with ‘underground water.’” United States v.  
Cappaert, 508 F.2d 313, 315 n.1 (9<sup>th</sup> Cir. 1974), aff’d, 426 U.S. 128 (1976).

1 succinctly stated, "state water laws do not apply to 'reservations' -- lands withdrawn from the  
2 public domain." United States v. Cappaert, 508 F.2d 313, 320 (9<sup>th</sup> Cir. 1974) (citation omitted),  
3 aff'd, 426 U.S. 128 (1976). With respect to the Tribe, there is only one perennial stream on the  
4 Reservation -- the Walker River. The majority of the Reservation lands are "arid and, without  
5 irrigation . . . practically valueless . . ." Winters, 207 U.S. at 576. Surface water, combined with  
6 additional groundwater, will enable the Tribe to obtain value from those lands, thereby satisfying  
7 the purposes of the Reservation, and federal law alone controls the adjudication of the Tribe's and  
8 the United States' rights to surface water and groundwater.<sup>4</sup>

9  
10  
11 **C. IT IS INAPPROPRIATE TO CONSIDER THE MERITS OF THE TRIBE'S AND**  
12 **THE UNITED STATES' CLAIMS FOR ADDITIONAL WATER BEFORE**  
13 **COMPLETION OF SERVICE OF THE FIRST AMENDED COUNTERCLAIMS.**

14 The District attempts to argue the merits of the Tribe's and the United States' prima facie  
15 showing that there is a hydrologic connection between groundwater and surface water in the  
16 Walker River Basin. The District argues that the Pyle Affidavit does not differentiate among the  
17 sources of water for wells, account for plant consumption, or provide information regarding the  
18 extent to which groundwater pumping will affect stream flows. District Response at 10. The  
19 District asserts that the Pyle Affidavit does not analyze competition among groundwater

20  
21 \_\_\_\_\_  
22 <sup>4</sup>The District and Nevada argue for consideration of groundwater claims separately from  
23 surface water claims, because "the Nevada State Engineer has adequate authority to proceed with  
24 one or more groundwater adjudications and, if necessary, to join the Tribe and the United States."  
25 District Response at 14 (citing NEV. REV. STAT. §§ 534.100, 533.090-533.320). See also Nevada  
26 Response at 3 n.1. This argument begs the question whether the Tribe's and the United States'  
27 claims to additional water will have an impact upon groundwater claimants. In any event, the  
28 Court acquired jurisdiction over the adjudication of rights to use water in the Walker River Basin  
in 1924, the Court has been intimately involved in such adjudication since that time, and no state  
court has ever commenced a parallel adjudication of such rights that could threaten inconsistent  
dispositions of a single body of water. Colorado River, 424 U.S. at 818-19; San Carlos Apache  
Tribe, 463 U.S. at 569. There simply is no argument for state jurisdiction over the Tribe's and the  
United States' claims for additional water.

1 claimants. Id. at 11. The District concludes that “[w]ithout such specific allegations, the  
2 assertion that surface water and groundwater users are or will be in competition for waters  
3 comprising a single res is speculative and insufficient to require joinder under Rule 19 of  
4 groundwater claimants located in the Walker River Basin.” District Response at 12. Nevada  
5 posits that the Court must answer myriad questions that go to the merits of the Tribe’s and the  
6 United States’ claims to groundwater before it considers whether the Tribe and the United States  
7 should serve groundwater claimants in addition to surface water claimants. Nevada Response at  
8 3. California argues that there is no “nexus” between the Pyle Affidavit and “each of the U.S. and  
9 Tribe’s claims.” California Response at 6.

10  
11  
12 In the first place, the District, Nevada and California have failed to read the Pyle Affidavit  
13 carefully. The Pyle Affidavit identifies the source of water for wells: “wells located closer to the  
14 river will derive most of their water from the River, whereas others farther away may be more  
15 dependent on natural recharge, irrigation return flows to ground water, and ground water storage  
16 in the aquifer.” Id. at 4. The Pyle Affidavit accounts for plant consumption: “I have reviewed  
17 and analyzed numerous published and unpublished reports and data related to ground water and  
18 surface water in the Walker River watershed, including . . . phreatophytes . . . .” Id. at 1. And  
19 the Pyle Affidavit more than adequately analyzes the effect groundwater pumping has upon  
20 stream flows:  
21

22 [T]he difference between surface inflow and outflow cannot be  
23 accounted for by surface diversions alone, particularly during a  
24 relatively dry year such as 1994. Wet years, such as 1995, cause  
25 ground-water levels to increase, indicating the Walker River and  
26 some amount of the water diverted for irrigation, recharges the  
27 ground-water aquifers that were depleted by pumping from wells  
28 during the preceding dry period. Therefore, even during wet years  
the surface outflow reflects stream depletion caused by ground-  
water pumping.

1 Id. at 5.

2 In the second place, the District, Nevada and California have blurred the distinction  
3 between notice pleading and discovery. As the Supreme Court has pointed out:

4 [T]he Federal Rules of Civil Procedure do not require a claimant to  
5 set out in detail the facts upon which he bases his claim. To the  
6 contrary, all the Rules require is "a short and plain statement of the  
7 claim" that will give the defendant fair notice of what the plaintiff's  
8 claim is and the grounds upon which it rests.

9 Conley v. Gibson, 355 U.S. 41, 47 (1957) (quoting FED. R. CIV. P. 8(a)(2)). The purpose of  
10 pleading is to provide notice to the defendant. The first amended counterclaims accomplish that  
11 purpose. In addition, the Tribe and the United States have made a prima facie showing of fact  
12 that there is a hydrologic connection between groundwater and surface water in the Joint Motion.  
13 If the District, Nevada, California and groundwater users dispute factual matters, they can do so  
14 after the Court deems that service is complete and it becomes time to address the merits of the  
15 amended counterclaims. The groundwater claimants, on the other hand, are not yet aware that  
16 their interests may be at stake because they are not yet parties to these proceedings. Provident  
17 Tradesmens Bank & Trust Co. v. Patterson, 390 U.S. 102, 111 (1968) ("a court . . . should, on its  
18 own initiative, take steps to protect the absent party who of course had no opportunity to plead  
19 and prove his interest . . ."). The real risk in this case is that the groundwater claimants will not  
20 be made aware of these proceedings, when their interests will be affected by, and may affect, the  
21 nature of the rights at issue here.

22  
23 The Court already has ruled that consideration of the merits of the Tribe's and the United  
24 States' additional claims to water is premature unless and until the Tribe and the United States  
25 serve, consistent with FED. R. CIV. P. 4, all water claimants who may be affected by the additional  
26 claims to water:  
27

In this case the Tribe and the United States want the Court to recognize additional water rights for the Tribe and integrate these rights into the Decree. Such a recognition might have the effect of reducing the water allocated to other federal rights holders or altering the priority which their allocation is given. Such a recognition may also give the Tribe's newly recognized rights priority over claimants who acquired their rights through a state permit. Thus, the claimants to the water of the Walker River clearly have an interest in the action.

....

In accordance with Rule 19, all claimants to the water of the Walker River and its tributaries must be joined as parties to the claim.

In order to be joined as a party, a person must be served in accordance with Rule 4 of the Federal Rules of Civil Procedure. In order to sufficiently join all appropriate parties, the Tribe and the United States must serve with process all claimants to the water of the Walker River and its tributaries.

*Order* at 5-6 (Oct. 27, 1992).

The Court has issued similar orders respecting Mineral County's attempt to intervene in these proceedings in order to claim a water right for Walker Lake. *Order Requiring Service of and Establishing Briefing Schedule Regarding the Motion to Intervene of Mineral County* at 2-3 (Feb. 9, 1995) (requiring Mineral County to serve all claimants who could be affected by its claims to water for Walker Lake); *Order* at 3-4 (June 2, 1998) (requiring showing of individualized due diligence in service of process in order to provide claimants affected by Mineral County's water rights claims notice and a chance to object). The District and Nevada have urged the Court to make such rulings:

The Court cannot grant effective preliminary or permanent relief on the merits only with respect to Walker River Claimants who are properly served. If and when there is a decision on the request for preliminary relief or for permanent relief on the merits, it will be essential for the [C]ourt to have jurisdiction to render a valid order

1 or judgment which binds all water right claimants. On a river  
2 system, an order or judgment which did anything less would result  
3 in chaos.

4 *Response to Motion for Publication and Pre-Hearing Report of the Walker River Irrigation*  
5 *District at 3 (Apr. 28, 1998). Accord Walker River Irrigation District's Reply to Walker River*  
6 *Paiute Tribe's Response and Mineral County's Opposition to Motion to Vacate Schedule; and*  
7 *Opposition to Mineral County's Countermotion for Sanctions at 13 (July 25, 1995) ("the District*  
8 *has a vital interest in ensuring that Mineral County effects proper service so that all Walker River*  
9 *Water Claimants are properly joined in this matter and that any final judgment entered by the*  
10 *Court is binding on all affected persons."); Nevada Response at 4 (citing *State of Nevada's**  
11 *Preliminary Threshold Motions re Dismissal of Counterclaims, Additional Parties and Service of*  
12 *Process at 3-8 (Aug. 3, 1992)); *State of Nevada's Response to Mineral County's Motion for**  
13 *Order of Publication (Second Request) at 2-3 (Apr. 28, 1998). Yet with respect to the Tribe's*  
14 *and the United States' amended counterclaims, the District and Nevada have argued that the*  
15 *Court should consider issues going to the merits of the Tribe's and the United States' additional*  
16 *claims for water before they have served those water rights claimants whose rights may be*  
17 *affected by the additional claims to water. The Court should not sanction such inconsistent*  
18 *behavior.*

21 The District's, Nevada's and California's claims of inadequacy in the Tribe's and the  
22 United States' first amended counterclaims are inapposite. The Court has held and reiterated that  
23 it will not consider or allow the parties to brief the merits of claims for additional water that will  
24 alter the 1936 Decree until all claimants whose water rights may be affected by such additional  
25 claims are parties to these proceedings, that is, served according to FED. R. CIV. P. 4. See, e.g.,  
26 *Order Requiring Service of and Establishing Briefing Schedule Regarding the Motion to*  
27

1 *Intervene of Mineral County* at 4 (Feb. 9, 1995) (ordering that parties should not respond to  
2 Mineral County's intervention documents until the Court so orders upon completion of service).  
3 The Court should, therefore, disregard the District's arguments in its Section II(G), on pages 8 to  
4 11 of its Response, and Nevada's arguments in its Section I, page 3, because the issues they raise  
5 in those sections are not ripe at this time.<sup>5</sup>

7 Nevada has included a Motion for More Definite Statement in its responsive brief, arguing  
8 that the Tribe and the United States have not done enough "for Nevada as well as other current or  
9 potential parties to formulate a proper response." Nevada Response at 2. Nevada, like the  
10 District, attempts to go beyond the procedural nature of -- and the discrete issue raised by -- the  
11 Joint Motion and argues that the Tribe and the United States must delve into the merits of their  
12 claims for additional water. *Id.* at 3. Not only does Nevada's position contravene the Court's  
13 order requiring the Tribe and the United States to complete service of process pursuant to FED. R.  
14 CIV. P. 4 before consideration of the merits of their claims may take place, it also disregards the  
15 requirements of notice pleading, which the Tribe and the United States have satisfied. The Court  
16 should, therefore, deny Nevada's Motion for More Definite Statement. The Joint Motion is  
17 sufficiently definite.<sup>6</sup>

---

23 <sup>5</sup>Appointment of a special master, as the District suggests, District Response at 15, would  
24 be particularly untimely as the factual merits of the Tribe's and the United States' claims for  
additional water cannot be considered before completion of service.

25 <sup>6</sup>In fact, the availability of a motion for more definite statement under FED. R. CIV. P.  
26 12(e) is very limited. As an initial matter, a Rule 12(e) motion is limited to "a pleading to which a  
27 responsive pleading is permitted . . . ." The Federal Rules of Civil Procedure distinguish between  
28 a "pleading," FED. R. CIV. P. 7(a), and a "motion," FED. R. CIV. P. 7(b). Thus, Rule 12(e) does  
not apply to the Joint Motion because it is not a "pleading" within the meaning of the Rules.

1           The District notes that no one has ever brought an action in this Court “alleging that  
 2 groundwater pumping was depleting surface water rights recognized by the Decree.” District  
 3 Response at 8 n.1. The District appears to imply that because no one has raised this issue in prior  
 4 pleadings, the Tribe and the United States somehow are foreclosed from making such claims now.  
 5 It is well-settled, however, that Indian property rights, including those to water, may not be lost  
 6 through non-use, adverse possession, statutes of limitation, laches, acquiescence or otherwise.  
 7 County of Oneida v. Oneida Indian Nation, 470 U.S. 226, 236-48 (1985); Winters, 207 U.S. at  
 8 576-77; United States v. Ahtanum Irrigation Dist., 236 F.2d 321, 334 (9<sup>th</sup> Cir. 1956), cert. denied,  
 9 352 U.S. 988 (1957). See Order at 6 (June 2, 1998) (“this action . . . is essentially one to quiet  
 10 title to property.”(footnote omitted)); Minutes of the Court at 2 (Apr. 1, 1997) (this “is an action  
 11 the subject of which is real property.”). The fact that until now no one has ever alleged a  
 12 hydrologic connection between surface water and groundwater in this matter, therefore, is  
 13 irrelevant to the Tribe’s and the United States’ claims.  
 14

15  
 16  
 17           **III. SERVING GROUNDWATER USERS**  
 18           **IS APPROPRIATE AT THIS TIME**

19           **A. FEDERAL RULE OF CIVIL PROCEDURE 19 REQUIRES JOINDER OF THE**  
 20           **GROUNDWATER CLAIMANTS.**

21           Before the Court is uncontested expert testimony demonstrating a hydrologic connection  
 22 between surface water and groundwater in the Walker River Basin; those waters form the single  
 23 water body over which the Court has continuing jurisdiction. Considering the “interest of the  
 24 courts and the public in complete, consistent, and efficient settlement of controversies,” Provident  
 25 Tradesmens, 390 U.S. at 111, and the interests of the parties who claim water in the Basin in  
 26 having their claims to water resolved once and for all, the Tribe and the United States have  
 27  
 28

1 requested that the Court allow joinder of claimants to groundwater. The Court already has  
2 recognized that groundwater claimants may become necessary parties to the instant litigation:

3  
4 Joinder of the ground water claimants would be required if: (1) in  
5 their absence complete relief could not be accorded among those  
6 already parties, or; (2) their claims to groundwater relate to the  
7 subject of this action (the U.S. and Tribe's claims to waters from  
8 the Walker River) and proceeding without the groundwater  
9 claimants might (i) as a practical matter impair or impede their  
10 ability to protect their interests or (ii) leave any of the current  
11 parties subject to a risk of multiple or inconsistent obligations.

12 *Order* at 9-10 (July 8, 1994) (citing FED. R. CIV. P. 19(a)). As paraphrased by the District,  
13 "joinder of groundwater claimants is required under Rule 19 . . . [because] groundwater claims  
14 and rights . . . affect the water rights of the parties who have or claim rights to the waters of the  
15 Walker River or vice versa." District Response at 7. FED. R. CIV. P. 19 requires joinder of  
16 groundwater claimants now that the Tribe and the United States have amended their  
17 counterclaims to include claims to additional surface water and groundwater in order to satisfy the  
18 purpose of setting aside the enumerated tribal lands and other federal enclaves.

19  
20 1. **The Present Parties Cannot Obtain Complete Relief Without Joinder of the**  
21 **Groundwater Claimants.**

22 "To determine if the absent party is necessary to the suit, the court must undertake  
23 [a] two-part analysis." Makah Indian Tribe v. Verity, 910 F.2d 555, 558 (9<sup>th</sup> Cir. 1990). First,  
24 "the court must decide if complete relief is possible among those already parties to the suit. This  
25 analysis is independent of the question whether relief is available to the absent party." Id. (citation  
26 omitted). In the absence of the groundwater claimants, complete relief cannot be accorded the  
27 present parties to these proceedings because the use of groundwater directly affects the use of  
28 surface water. See, e.g., Pyle Affidavit at 4, 8. In fact, present groundwater diversions already  
affect surface water availability in the Basin. Id. at 5, 9-10.

1           As a practical matter, then, failure to join the groundwater claimants may result in  
2 the inability of surface water claimants to protect their claims because the groundwater users may  
3 draw down the water in the Basin too much, thereby reducing the amount of surface water  
4 available. Unless the groundwater claimants are joined in this proceeding, the final decree will not  
5 be binding on them. See, e.g., Provident Tradesmens, 390 U.S. at 110 (“since the outsider is not  
6 before the court, he cannot be bound by the judgment rendered.”); *Walker River Irrigation*  
7 *District’s Reply to Walker River Paiute Tribe’s Response and Mineral County’s Opposition to*  
8 *Motion to Vacate Schedule; and Opposition to Mineral County’s Countermotion for Sanctions at*  
9 *13* (July 25, 1995) (noting necessity of binding all those with an interest in the proceedings).  
10 Therefore, the present parties cannot be assured that their rights to water, as the Court will  
11 eventually ascertain them, will survive subsequent groundwater claims unless the Court  
12 adjudicates groundwater claims at this time. “Rule 19 is designed to protect the interests of  
13 absent persons, as well as those already before the court, from duplicative litigation, inconsistent  
14 judicial determinations, or other practical impairment of their legal interests.” Hammond v.  
15 Clayton, 83 F.3d 191, 195 (7<sup>th</sup> Cir. 1996) (citations omitted). Simply put, without joinder of  
16 groundwater claimants in the Walker River Basin, complete relief for the present parties is not  
17 possible.  
18

21           2.       **The Tribe’s and United States’ Additional Claims to Water Will Affect the**  
22                   **Rights of Groundwater Claimants in the Basin.**

23           The Court should next “determine whether the absent party has a legally protected  
24 interest in the suit.” Makah, 910 F.2d at 558. If a legally protected interest exists, the Court must  
25 further determine whether that interest could be impaired or impeded by the suit. Id.  
26 Groundwater claimants’ interests in the Walker River Basin directly relate to the subject matter of  
27  
28

1                   As part of this second consideration, the Court should additionally consider  
2 whether a risk of inconsistent rulings threatens the present parties. Allocation of rights to a  
3 limited resource to which absent parties may be entitled can create such a threat. Makah, 910  
4 F.2d at 558-59. If groundwater claimants are not joined in this action, the present parties are at a  
5 very real risk of incurring inconsistent obligations as a result of future adjudication of the  
6 groundwater claims, in a different proceeding, and probably in a different forum. Id.; Colorado  
7 River, 424 U.S. at 819; San Carlos Apache Tribe, 463 U.S. at 569. “If we fail to properly acquire  
8 jurisdiction by service of process, a single party adversely affected by a judgment entered in this  
9 case and who was not properly served could conceivably later challenge the validity of that  
10 judgment, notwithstanding the extensive work that will no doubt be necessary to adjudicate . . .  
11 [additional] claim[s].” *Order* at 5 (June 2, 1998).

14                   Just as “[a]llocation of a limited fund to which absent parties are entitled may  
15 create such a risk,” Makah, 910 F.2d at 559, allocation of a single, limited body of water to  
16 which many entities claim many types of appropriations also creates such a risk. See Provident  
17 Tradesmens, 390 U.S. at 108 (assuming that a party was necessary when “there existed . . . at  
18 least the possibility that a judgment might impede [his] ability to protect his interest, or lead to  
19 later relitigation by him.”); Hurley v. Abbott, 259 F. Supp. 669, 670 (D. Ariz. 1966) (holding that  
20 “[d]ue to the inter sese nature of appropriative rights the extent of the rights of others must  
21 depend on the rights of one user, and vice versa . . . and all must be made a party to the suit.”  
22 (citations omitted)). Simply put, failure to join groundwater claimants in these proceedings raises  
23 the spectre of subjecting the present water rights claims in the Basin to challenge in subsequent  
24 proceedings.  
25  
26  
27  
28

1           **B. ESTABLISHMENT OF A PROCESS FOR SERVICE OF PLEADINGS IS**  
2           **APPROPRIATE NOW.**

3           The District, Nevada and California argue that establishment of a process for service of  
4 pleadings upon parties to these proceedings is premature. District Response at 17; Nevada  
5 Response at 6; California Response at 6. Whether the Court permits the Tribe and the United  
6 States to include groundwater claimants in service of their first amended counterclaims,  
7 establishment of a process for service of pleadings is appropriate at this time. The number of  
8 surface water claimants who may be affected by the Tribe's and the United States' additional  
9 claims to water is large, as the captions to the first amended counterclaims show. In fact, the  
10 captions list approximately 1,200 surface water claimants before including "all other unknown  
11 claimants to groundwater." Tribe's 1<sup>st</sup> Amended Counterclaim at 12. Accord U.S. 1<sup>st</sup> Amended  
12 Counterclaim at 9-10.  
13  
14

15           For this reason, the Tribe and the United States submitted a proposed process that could  
16 make service of pleadings upon joined parties efficient. Joint Motion at 6-8, Attachments 6, 7.  
17 The Tribe and the United States are, of course, willing to consider other approaches. The issue  
18 remains, however, that the sheer number of potential parties to these proceedings make  
19 establishment of a process for service of pleadings imperative, and it is better done now than after  
20 the addition of more than 1,200 parties. The same is true for the Court's approval of the forms of  
21 notice and waiver of service that the Tribe and the United States submitted. Id., Attachments 2-5.  
22 Resolution of these procedural issues at this time is in no way premature.  
23

24           **C. THE TRIBE AND THE UNITED STATES DO NOT WISH TO RELY UPON**  
25           **MINERAL COUNTY'S SERVICE EFFORTS AT THIS TIME.**

26           The District, the United States Board of Water Commissioners, and Nevada all object to  
27 any reliance by the Tribe and the United States upon service that Mineral County has completed  
28

1 successfully. See District Response at 16; USBWC Response at 2; Nevada Response at 6. The  
2 Tribe and the United States did not present any argument on this issue in the Joint Brief, and  
3 intended to remove all reference to it therein. Accordingly, the Tribe and the United States  
4 hereby withdraw the sentence in the Joint Motion stating, “to eliminate the requirement for  
5 personal service upon those surface water claimants Mineral County has served successfully.”  
6 Joint Motion at 2.  
7

#### 8 **IV. CONCLUSION**

9 As the United States Board of Water Commissioners observes, “the issues addressed in  
10 the Joint Motion are sufficiently complex to warrant the Court’s consideration of a Scheduling  
11 and Planning Conference under Local Rules 16-1 and 16-2.” USBWC Response at 1. The Tribe  
12 and the United States agree that a scheduling and planning conference is warranted in order to  
13 resolve the discrete procedural issue of whether the Tribe and the United States must serve  
14 groundwater claimants in the Walker River Basin with their first amended counterclaims.  
15

16 The Tribe and the United States have made a prima facie showing of the hydrologic  
17 connection between groundwater and surface water in the Basin. That connection amply supports  
18 the inclusion of groundwater claimants in service of process by the Tribe and the United States for  
19 two reasons. First, the Tribe and the United States have made claims to groundwater. Second,  
20 the Tribe and the United States have shown in the Pyle Affidavit that groundwater pumping in the  
21 Walker River Basin conflicts with surface water use, and appreciably reduces the availability of  
22 surface water from the Walker River on, and groundwater underlying, the Walker River Indian  
23 Reservation. Rule 19, therefore, requires inclusion of groundwater claimants in the Tribe’s and  
24 the United States’ service efforts. The arguments of the District, Nevada and California do not  
25 change this result.

---

1 this action because groundwater is hydrologically connected to surface water in the Basin. See  
2 Pyle Affidavit at 4 (“The ground water and surface water in the Walker River watershed are  
3 connected and are predominantly derived from the same source. Therefore, increasing diversion  
4 and use of one will affect the other.”). Because of the relation between groundwater and surface  
5 water, final determination of the rights at issue in this case will likely impair the groundwater  
6 claimants’ ability to protect their interests. Even if the groundwater claimants’ interests are left  
7 for some future determination, those interests remain significantly related to the interests at stake  
8 in these proceedings, specifically the Tribe’s and United States’ claims for more water.  
9

10  
11 The relation between the different interests requires that for complete  
12 consideration of groundwater claimants’ interests, the present parties will have to be joined in any  
13 such future determinations, threatening a duplicative and wasteful expenditure of judicial  
14 resources. Moreover, joining the present parties in a future case will require significant  
15 expenditures by the future parties. The costs may be prohibitive to some of the parties. See, e.g.,  
16 *Motion for Order of Publication (Third Request)* at 5 (Aug. 4, 1998) (“The cost is no longer a  
17 test of Mineral County’s resolve to enter this litigation in order to preserve Walker Lake, but has  
18 now become so cost prohibitive that Mineral County will be foreclosed from the litigation  
19 altogether . . .”). If the costs of joinder and service of the present parties in a future  
20 determination groundwater claimants’ interests are prohibitive, the groundwater claimants’ ability  
21 to protect their interests will be impaired. Clearly, the interests of judicial economy and  
22 comprehensive resolution of the questions at issue warrant the inclusion of the groundwater  
23 claimants in the present action, where the parties necessary for complete determination of the  
24 groundwater claimants’ interests already are assembled.  
25  
26  
27  
28
